## **ENERGY COST SURCHARGE – FROM 4 MAY 2026**

Dear Sir or Madam,  
Dear Customers!

Current developments in the energy market will continue to lead to significant fluctuations and increases in energy and, in particular, transportation costs.

Despite ongoing internal optimizations, these cost increases cannot be sustainably reflected in the existing pricing structure.

**For this reason, we will charge an energy cost surcharge of €8.90 per delivery for deliveries starting Monday, May 4, 2026.**

The calculation is based on the difference between the average fuel price according to the official energy table of the responsible ministry – see link Energy Costs – and the current reference value.

The current energy cost surcharge of €8.90 was fixed with the applicable reference value of €2.00 diesel price.

Depending on the development of this diesel price, the surcharge is increased or decreased by a percentage once a month, around the middle of the month.

Falling energy prices therefore have a correspondingly reducing effect on the surcharge.

The basis for the development of this energy cost surcharge is the official table of fuel prices from the Federal Ministry for Economic Affairs, Energy and Tourism:

05.01.2026	1,495	1,47	1,719	1,054	1,389

Die Daten werden wöchentlich donnerstags aktualisiert.

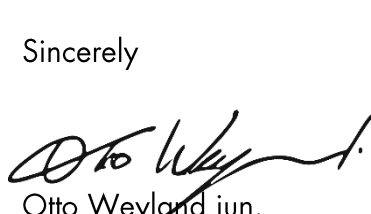

With this flexible and transparent solution, we aim to ensure a fair and comprehensible cost distribution while maintaining our usual high delivery quality and reliability.

In the future, you can find the current energy cost surcharge on our website [www.weyland.at/energiekostenzuschlag](http://www.weyland.at/energiekostenzuschlag).

Thank you for your understanding and continued cooperation.

We are, of course, happy to answer any questions or provide further information.

Sincerely

Otto Weyland jun.
